Abstract

Twenty-one species of acanthocephalans, representative of thirteen genera from ten families of seven orders and three classes, are included in this updated checklist of acanthocephalans in South Africa. Although South Africa appears to have a less diverse acanthocephalan fauna compared to some other countries such as Iran in Asia, or Brazil in South America, this is probably an artefact of fewer parasitological surveys.

Keywords

Acanthocephala, helminths, diversity, wildlife, Africa

Introduction

South Africa's landscape is the third most biologically diverse in the world with 6% of the world's mammal species, 8% of bird species and 5% of reptile species of which many are endemic (da Silva and Willows-Munro 2016). In regard to invertebrates, only 36,803 species are listed for Africa, and 12,098 for South Africa (Hamer 2010). It is said that in South African habitats, there are many undiscovered and undescribed animal species, especially invertebrates. It is estimated that as many as 80,000 South

African animal species remain to be discovered or described, and most of these animals are invertebrates (Hamer 2013).

The most comprehensive checklist of helminth parasites of Africa was compiled for freshwater fishes by Khalil (1971) and updated by Khalil and Polling (1997). It included very few records of acanthocephalans considering the total number of freshwater fish species present in the continent. The updated list (Khalil and Polling 1997) comprised 568 adult helminth parasites of which only 21 species are acanthocephalans. These records were compiled from 359 species of African freshwater fishes (assigned to 89 genera belonging to 32 families) of an estimated 3000 existing inland fish species (Khalil and Polling 1997). These examples illustrate the lack of knowledge of the helminth fauna of the wildlife of the African continent in general and in South Africa in particular.

This is the first checklist of acanthocephalans of South Africa and the aim is to provide a comprehensive record of all the previously reported species of Acanthocephala occurring in South African hosts as well as new records from our on-going research on parasites of wildlife, while simultaneously demonstrating the need for more extensive parasitological surveys.

Materials and methods

Data were obtained from two sources, published records and our own ongoing studies on the Acanthocephala of South African wildlife. These data are presented in two parts. In the first part parasites are listed systematically, with families, genera, and species in alphabetical order. The scientific name, including any synonyms, followed by the scientific and common name of the host, the locality in which the parasite was reported and museum (location) of type specimens where known. In the second part, the hosts are listed systematically by their scientific names and parasite records from each host are given together with locality and reference. The records without references are those of our ongoing study that are being reported here for the first time.

Classification of the Acanthocephala follows Amin (2013). For the hosts, fish taxonomy is based on Skelton (2001, 2016) and Fishbase (Froese and Pauly 2016), bird taxonomy is based on Clements et al. (2016) and mammal taxonomy on Wilson and Reader (2005) and Apps (2012).

Abbreviations for museums are:

BMNH Natural History Museum London, London, UK;

GNM Gothenburg Natural History Museum, Gothenburg, Sweden;

SAMCTA South African Museum at Cape Town, South Africa;

SAM South Australian Museum, Adelaide, Australia;

USNM Helm. Coll. United States National Museum Helminthological Collection
USNPC United States National Parasite Collection now held in the In-

vertebrate Zoology collection of the Smithsonian Museum,

Washington, USA.

Acanthocephalan specimens from our ongoing wildlife parasitology projects were mostly collected from roadkill animals, museum collections, hunting/culling surveys and other research permits received for a limited number of specimens through the Limpopo Department of Economic Development, Environment and Tourism (LEDET) (permit number CPM004961 and ZA/LP/HO/3370 for freshwater fish research, 001-CPM403-00012 and ZA/LP/HO/3448 for frogs, ZA/LP/HO/3432 for rodents and ZA/LP/87586 for roadkills).

Acanthocephalans from freshly dead animals were placed in tap water and refrigerated for a few hours to one day until the proboscis was everted and then fixed and stored in 70% ethanol until studied. Acanthocephalans from frozen hosts were fixed and stored in 70% ethanol. Some specimens were prepared for examination by staining in Mayer's acid carmine, destained in HCl in 70% ethanol, dehydrated through increasing concentrations of ethanol, cleared in xylene, and mounted as whole worms in Canada balsam. Other worms were examined as temporary mounts following clearing in lactophenol or beechwood creosote.

A total of 102 species of birds (151 individuals), 72 of mammals (420 individuals), 9 of reptiles (18 individuals) and 42 (1050 individuals) of fishes were examined for this study (details in Table 1).

Table 1. Total number of host taxa examined and those infected with acanthocephalans (i.e. number of taxa that harboured acanthocephalans, in parenthesis) during our ongoing study on wildlife parasites in South Africa.

Taxon Group	Order	Family	Genus	Species
Amphibians	1 (0)	8 (0)	13 (0)	19 (0)
Birds	21 (5)	50 (5)	87 (5)	102 (5)
Fishes (freshwater)	8 (1)	13 (1)	24 (1)	42 (1)
Mammals	10 (4)	26 (4)	59 (6)	72 (6)
Reptiles	3 (1)	6 (1)	7 (1)	9 (1)
Totals	43 (11)	103 (11)	190 (13)	244 (13)

Parasite-Host List

Acanthocephala

Class: Archiacanthocephala Meyer, 1931

Order: Gigantorhynchida Southwell & Macfie, 1925

Family: Gigantorhynchidae Hamann, 1892 Genus: *Mediorhynchus* Van Cleave, 1916

Mediorhynchus africanus Amin, Evans, Heckmann & El-Naggar, 2013

Empodius segmentatus (de Marval, 1902) Southwell & Mac-Fie, 1925

Mediorhynchus selengensis Harris, 1973

Marval, 1973

M. gallinarum (Bhalerao, 1937) Van Cleave, 1947 sensu Junker & Boomker, 2006

Notes. *M. gallinarum* is found only in Asia and the species in Africa is actually *M. africanus* (Amin et al. 2013; Amin 2013) and not *M. gallinarum* previously reported in South Africa (Junker and Boomker 2006).

Host. Numida meleagris (L. 1758) (Helmeted Guineafowl) (Numididae) (type host).

Localities. Kruger National Park, Mpumalanga Province, South Africa (type locality) (Junker and Boomker 2006); Vicinity of Petrus Steyn, Free State Province, South Africa (Davies et al. 2008); Musina, Limpopo Province, South Africa (Junker and Boomker 2007; Junker et al. 2008).

Mediorhynchus mokgalongi Smales & Halajian, 2018

Host. Turdus smithi Bonaparte, 1850 (Karoo Thrush) (Turdidae) (type host).

Locality. Polokwane, Limpopo Province, South Africa (type locality) (Smales et al. 2018).

Type specimens. Holotype male SAM AHC 48068, allotype female SAM AHC 48069, paratype SAM AHC 48070.

Mediorhynchus numidae (Baer, 1925) Meyer, 1932

Heteroplus numidae Baer, 1925; Empodisma numidae (Baer, 1925) Yamaguti, 1963

Host. Numida meleagris (L. 1758) (Helmeted Guineafowl) (Numididae) **Locality.** Pretoria, Gauteng Province, South Africa (Oosthuizen and Markus 1967).

Mediorhynchus taeniatus (von Linstow, 1901) Dollfus, 1936

Echinorhynchus taeniatus von Linstow, 1901; E. segmentatus de Marval, 1902

Host. Numida meleagris (L. 1758) (Helmeted Guineafowl) (Numididae).

Locality. Rooipoort farm, Kimberley, Northern Cape Province, South Africa (Crowe 1977).

Host. Tockus leucomelas (Lichtenstein, 1842) (Southern Yellow-billed Hornbill) (Bucerotidae)

Locality. Limpopo Province, South Africa.

Order: Moniliformida Schmidt, 1972

Family: Moniliformidae Van Cleave, 1924

Genus: Moniliformis Travassos, 1915

Moniliformis kalahariensis Meyer, 1931

Host. Atelerix frontalis (Smith, 1831) (Southern African Hedgehog) (Erinaceidae) **Locality.** Mohlonong village and University of Limpopo, Limpopo Province,
South Africa (Amin et al. 2014).

Moniliformis moniliformis (Bremser, 1811) Travassos, 1915 (type species)

Echinorhynchus moniliformis Bremser, 1811

E. grassi Railliet, 1893

E. canis Porter, 1914

E. belgicus Railliet, 1919

Moniliformis moniliformis aegypticus Meyer in Petrochenko, 1958

M. dubius Meyer, 1932

M. travassosi Meyer, 1932 (fide Machado Filho 1946, Van Cleave 1952)

Host. Atelerix frontalis (Smith, 1831) (Southern African Hedgehog) (Erinaceidae).

Locality. Hammanskraal, Gauteng Province, South Africa (Le Roux 1930).

Notes. Host recorded as *Aethechinus frontalis* in Le Roux (1930).

Moniliformis acomysi Ward & Nelson, 1967

Host. Gerbilliscus leucogaster (Peters, 1852) (Bushveld Gerbil), Mastomys natalensis (Smith, 1834) (Natal Mastomys), Mus minutoides (Pygmy mouse) (Muridae).

Localities. Bloemhof, Free State Province; Vyeboom village, Limpopo Province; Hoopstad, Free State Province; South Africa.

Moniliformis sp.

Host. Otolemur crassicaudatus (É. Geoffroy Saint-Hilaire, 1812) (Thick-tailed Bushbaby) (Galagidae).

Locality. Venda, Limpopo Province, South Africa.

Remarks. One male and one female worm were found in the small intestine of an adult bushbaby.

Order: Oligacanthorhynchida Petrochenko, 1956

Family: Oligacanthorhynchidae Southwell & Macfie, 1925

Genus: Heptamegacanthus Spencer Jones, 1990

Heptamegacanthus niekerki Spencer Jones, 1990 (type species)

Host. Chrysospalax trevelyani (Günther, 1875) (Giant Golden Mole) (Chrysochloridae) (type host).

Locality. Nqadu Forest, Transkei, Eastern Cape Province, South Africa (type locality) (Spencer Jones 1990).

Type specimens. Holotype male BMNH 1988.2480; allotype female BMNH 1988.2481; paratypes BMNH 1988.2482-2491.

Oligacanthorhynchidae sp.

Host. Varanus albigularis Daudin, 1802 (Rock Monitor) (Varanidae). **Localities.** Tzaneen; Tolwe, Limpopo Province, South Africa.

Class: Eoacanthocephala Van Cleave, 1936

Order: Gyracanthocephala Van Cleave, 1936

Family: Quadrigyridae Van Cleave, 1920

Genus: Acanthogyrus Thapar, 1927

Subgenus: Acanthosentis Verma & Datta, 1929

Acanthogyrus (Acanthosentis) phillipi (Mashego, 1988) Amin, 2005

Acanthosentis phillipi Mashego, 1988

Host. Enteromius neefi (Greenwood, 1962) (syn. Barbus neefi) (Sidespot Barb) (Cyprinidae) (type host).

Locality. Lingwe River, Venda, Limpopo Province, South Africa (type locality) (Mashego 1988).

Type specimens. Holotype in Transvaal Museum no. TM14659; Paratypes TM5 at University of Limpopo, Zoology, 5.

Acanthogyrus sp.

Host. Oreochromis mossambicus (Peters, 1852) (Mozambique Tilapia) (Cichlidae). Locality. Molepo Dam, Limpopo Province, South Africa (Kunutu et al. 2013).

Order: Neoechinorhynchida Southwell & Macfie, 1925

Family: Neoechinorhynchidae (Ward, 1917) Van Cleave, 1928

Genus: Neoechinorhynchus Stiles & Hassall, 1905 Subgenus: Neoechinorhynchus Hamann, 1892

Neoechinorhynchus (Neoechinorhynchus) dorsovaginatus Amin & Christison, 2005

Host. Argyrosomus japonicus (Temminck & Schlegel, 1843) (Japanese Meagre, Dusky Kob) Sciaenidae) (type host).

Locality. Breede River Estuary, Western Cape Province, South Africa (type locality) (Amin and Christison 2005).

Type specimens. No. SAMCTA29536 (holotype male and allotype female; same slide), nos SAMCTA29537-29545 (paratypes), USNPC no. 94918 (paratypes).

Class: Palaeacanthocephala Meyer, 1931

Order: Echinorhynchida Southwell & Macfie, 1925

Family: Pomphorhynchidae Yamaguti, 1939

Genus: Longicollum Yamaguti, 1935

Longicollum chabanaudi Dollfus & Golvan, 1963

Host. Barnardichthys fulvomarginata (Gilchrist, 1904) (syn. B. fulvomarginatus) (Soleidae) (Sole).

Locality. False Bay, Western Cape Province, South Africa (Dollfus and Golvan 1963).

Longicollum sp. innom.

Host. Pegusa nasuta (Pallas, 1814) (syn. Solea bleekeri) (Blackhand Sole) (Soleidae).

Locality. Klein River estuary, Hermanus, Western Cape Province, South Africa (Bray 1974).

Remarks. Three contracted and immature specimens were found in one fish and one male in another fish. Thus it could not be identified to species level (Bray 1974).

Family: Rhadinorhynchidae Lühe, 1912 Genus: *Rhadinorhynchus* Lühe, 1911

Rhadinorhynchus cadenati (Golvan & Houin, 1964) Golvan, 1969

Nipporhynchus cadenati Golvan & Houin, 1964

Host. Thyrsites atun (Euphrasen, 1791) (Snoek) (Gempylidae).

Locality. South Africa's West and South coasts (Nunkoo et al. 2016).

Rhadinorhynchus capensis Bray, 1974

Host. Pegusa nasuta (Pallas, 1814) (syn. Solea bleekeri) (Blackhand Sole) (Soleidae) (type host)

Locality. Heuninges River estuary, near Cape Agulhas, Western Cape Province, South Africa (type locality) (Bray 1974).

Type specimens. British Museum, Registration number 1974.521-550.

Rhadinorhynchus sp.

Host. Ruvettus pretiosus Cocco, 1833 (Oilfish) (Gempylidae).

Locality. South Africa's West coast, Atlantic Ocean (Nunkoo et al. 2017).

Order: Polymorphida Petrochenko, 1956

Family: Centrorhynchidae Van Cleave, 1916 (Golvan, 1960)

Genus: Centrorhynchus Lühe, 1911

Centrorbynchus sarehae Smales & Halajian, 2017

Host. *Kaupifalco monogrammicus* (Temminck, 1824) (Lizard Buzzard) (Accipitridae) (type host).

Locality. Makhado (Louis Trichardt), Limpopo Province, South Africa (type locality) (Smales et al. 2017).

Type Specimens. Holotype male SAM AHC 47858; allotype female SAM AHC 47859; paratypes SAM AHC 47860.

Centrorbynchus clitorideus (Meyer, 1931) Golvan, 1958

Gordiorhynchus clitorideus Meyer, 1931 (nec clitorideum)

Host. Bubo africanus(Temminck, 1821) (Spotted Eagle Owl) (Strigidae).

Locality. Zandrivierspoort Farm, Polokwane, Limpopo Province, South Africa.

Centrorhynchus sp.

Host. Felis catus L., 1758 (Domestic Cat) (Felidae).

Locality. Pretoria, Gauteng Province, South Africa (Baker et al. 1989).

Centrorhynchus sp.

Host. *Mungos mungo* (Gmelin, 1788) (Banded Mongoose) (Herpestidae). **Locality.** Polokwane, Limpopo Province, South Africa.

Family: Plagiorhynchidae Golvan, 1960

Genus: Plagiorhynchus Lühe, 1911

Subgenus: Prosthorbynchus Kostylew, 1915

Plagiorhynchus (Prosthorhynchus) cylindraceus (Goeze, 1782) Schmidt & Kuntz, 1966

Echinorhynchus cylindraceus Goeze, 1782

E. pici Gmelin, 1791 fide Florescu and Ienistea 1984

E. merulae Gmelin, 1791 fide Florescu and Ienistea 1984

E. transversus (Rudolphi, 1819) Travassos 1926

E. obliquus Dujardin, 1845 fide Florescu and Ienistea 1984

Centrorhynchus cylindraceus (Goeze 1782) Kostylew, 1914

C. fasciatus (Westrumb, 1821) Travassos, 1926 fide de Marval 1905

C. rostratus de Marval, 1902 fide Florescu and Ienistea 1984

Prosthorhynchus rosai (Porta, 1910) Meyer, 1932

Prosthorhynchus rostratus (de Marval, 1902) Meyer, 1932

Plagiorhynchus formosus Van Cleave, 1918 fide Amin et al. 1999

Plagiorhynchus taiwanensis Schmidt et Kuntz, 1966 fide Amin et al. 1999.

Host. Calidris ferruginea (Pontoppidan, 1763) (Curlew Sandpiper); Charadrius pecuarius Temminck, 1823 (Kittlitz's Plover); Charadrius tricollaris Vieillot, 1818 (Threebanded Plover) (Charadriidae).

Locality. Berg River, Western Cape Province, South Africa (Amin et al. 1999).

Host. Crecopsis egregia (Peters, 1854) (syn. Crex egregia) (African Crake) (Rallidae).

Locality. Blouberg, Limpopo Province, South Africa.

Host. Vanellus armatus (Burchell, 1822) (Blacksmith Lapwing) (Charadriidae).

Locality. Berg River, Western Cape Province, South Africa (Amin et al. 1999).

Unidentified plagiorhynchid

Host. Charadrius marginatus Vieillot, 1818 (White-fronted Plover), Charadrius pallidus Strickland, 1852 (Chestnut-banded Plover); Charadrius pecuarius Temminck, 1823 (Kittlitz's Plover); Himantopus himantopus (L., 1758) (Black-winged Stilt); Vanellus armatus (Burchell, 1822) (Blacksmith Lapwing)

Locality. Berg River, Western Cape Province, South Africa (Amin et al. 1999).

Family: Polymorphidae Meyer, 1931 Genus: *Andracantha* Schmidt, 1975

Andracantha tunitae (Weiss, 1914) Zdzitowiecki, 1989

Corynosoma tunitae Weiss, 1914

Host. *Microcarbo africanus* (Gmelin, 1789) (Long-tailed Cormorant) (Phalacrocoracidae). **Locality.** Dyer Island, South Africa (Van Cleave 1937).

Notes. Van Cleave (1937) is mentioning that he looked at a large number of immature worms and he tentatively assigning them to *C. tunitae*.

Genus: Arhythmorhynchus Lühe, 1911

Skrjabinorhynchus Petrochenko, 1956

Arhythmorhynchus turbidus (Van Cleave, 1937) Golvan, 1994

Corynosoma turbidum Van Cleave, 1937

Host. *Phalacrocorax neglectus* (Wahlberg, 1855) (Bank Cormorant) (Phalacrocoracidae) (type host).

Locality. Dyer Island, South Africa (type locality) (Van Cleave 1937).

Type specimens. Holotype female (1737, 3) and one paratype female (1737, 1) in GNM. One paratype female (1737, 2) in the collection of H.J. Van Cleave, Urbana, Illinois, U.S.A.

Genus: Bolbosoma Porta, 1908

Bolbosoma capitatum (von Linstow, 1880) Porta, 1908

Echinorhynchus capitatum von Linstow, 1880 Bolbosoma physeteris Gubanov, 1952 (fide Amin & Margolis, 1998)

Host. Ruvettus pretiosus Cocco, 1833 (Oilfish) (Gempylidae). Locality. South Africa's West coast, Atlantic Ocean (Nunkoo et al. 2017).

Bolbosoma vasculosum (Rudolphi, 1819) Porta, 1908

Echinorhynchus vasculosum Rudolphi, 1819

Bolbosoma annulatus Molin, 1858

B. aurantiacus Risso, 1826

B. pellucidus Leukart, 1828

B. serrani Linton, 1888

B. thunni Harada, 1935 (fide Petrochenko 1958)

Host. *Thyrsites atun* (Euphrasen, 1791) (Snoek) (Gempylidae). **Locality.** South Africa's West and South coasts (Nunkoo et al. 2016).

Genus: Corynosoma Lühe, 1904 (fide Van Cleave, 1945)

Chentrosoma Monticelli, 1905 Centrosoma Lühe, 1912 Coryusoma Railliet & Henry, 1907 (misprint) Echinosoma Porta, 1907

Corynosoma australe Johnston, 1937

Corynosoma otariae Morini & Boero, 1961

Host. *Thyrsites atun* (Euphrasen, 1791) (Snoek) (Gempylidae). **Locality.** South Africa's West and South coasts (Nunkoo et al. 2016).

Host-Parasite List

Host	Parasite	Locality Country/ Reference

Order Afrosoricida			
Family Chrysochloridae			
Chrysospalax trevelyani (type host)	Heptamegacanthus niekerki (Oligacanthorhynchidae)	Nqadu Forest, Transkai, Eastern Cape Province, South Africa (Spencer Jones 1990)	
Order Carnivora	1	· · · · · · · · · · · · · · · · · · ·	
Family Felidae			
Felis catus	Centrorhynchus sp. (Centrorhynchidae)	Pretoria, Gauteng Province, South Africa (Baker et al. 1989)	

Host	Parasite	Locality Country/ Reference
Family Herpestidae		
Mungos mungo	Centrorhynchus sp. (Centrorhynchidae)	Polokwane, Limpopo Province, South Africa.
Order Eulipotyphla		
Family Erinaceidae		
Atelerix frontalis (Aethechinus frontalis)	Moniliformis kalahariensis (Moniliformidae)	Mohlonong village and University of Limpopo, Limpopo Province, South Africa (Amin et al. 2014)
	Moniliformis moniliformis (Moniliformidae)	Hammanskraal, Gauteng Province, South Africa (Le Roux 1930)
Order Primates		
Family Galagidae		
Otolemur crassicaudatus	Moniliformis sp. (Moniliformidae)	Venda, Limpopo Province, South Africa
Order Rodentia		
Family Muridae		
Gerbilliscus leucogaster	Moniliformis acomysi (Moniliformidae)	Vyeboom village, Limpopo Province, South Africa
Mastomys natalensis	Moniliformis acomysi (Moniliformidae)	Bloemhof, Free State Province
Mus minutoides	Moniliformis acomysi (Moniliformidae)	Hoopstad, Free State Province, South Africa
Class Reptilia		
Order Squamata		
Family Varanidae		
Varanus albigularis	Oligacanthorhynchidae sp. (Oligacanthorhynchidae)	Tzaneen; Tolwe, Limpopo Province, South Africa

Results and discussion

A total of twenty-one species of acanthocephalans, from thirteen genera from ten families of seven orders, comprise this updated checklist of acanthocephalans in South Africa. Representatives of three of the four classes of acanthocephalans (Amin 2013) have been reported in South Africa, with only the Polyacanthocephala Amin, 1987 not having been recorded yet. The composition of reported acanthocephalan fauna shows that the Polymorphidae is the most represented family with five named species parasitic in marine fish and wild birds.

In South Africa, birds have the highest species richness of acanthocephalans to this date with nine named species (from five genera) and five records only identified to group level, followed by fish with eight named species (from six genera) and two species only identified to genus level, mammals with four named species (from two genera) and three species only identified to genus level and finally reptiles with a single species only identified to group level. No acanthocephalans have been reported in amphibians to date. During the current study 110 frog specimens belonging to 19 species were examined but none harboured any acanthocephalans. However, this forms a small part of the entire amphibian fauna of the country which includes 128 described frog species (Frost 2018).

Only a small fraction of the vertebrate fauna of South Africa has been surveyed for acanthocephalans and we expect that in future additional acanthocephalan species will be discovered and described. For example it is estimated that many of South Africa's marine fish parasites have yet to be discovered (Smit and Hadfield 2015). South Africa has an extremely rich biodiversity (Huntley et al. 2005), with nearly 8% of the world's known species of birds, 6% of mammal species and 5% of reptile species (Driver et al. 2012). Therefore we might expect a more diverse acanthocephalan fauna compared to that of Brazil which has 23 genera and 34 species (from only 119 fish species) (Santos et al. 2008) or Iran with 30 described species (Tavakol et al. 2015). The lower species richness reported for South Africa probably reflects sampling effort rather than the true diversity of the acanthocephalan fauna. Until more data are available it will not be possible to determine the true species richness of the South African acanthocephalan assemblage.

Acknowledgements

We would like to thank all the scientists who assisted us to access literature, particularly Geoffrey Allan Boxshall and David Gibson, and all those who helped AH with roadkill animals, especially Kgethedi Michael Rampedi and K David Kunutu. Special thanks are due to Ms Lorna Modiba (Librarian, University of Limpopo). Thanks also to Paul Skelton for his advice on fish species name changes. This work is based on the research supported by the South African Research Chairs Initiative of the Department of Science and Technology and National Research Foundation (NRF) of South Africa (Grant No 101054). Any opinion, finding and conclusion or recommendation expressed in this material is that of the author(s) and the NRF does not accept any liability in this regard.
